Skyview
Integral Air
PRODUCT OVERVIEW

Condensing Air system is an alternative to traditional centralized/remote supermarket refrigeration systems operating with racks of multiple compressors and other components located in plant rooms.

Major advantages of Integral system compared to remote solution:

Environmental friendly /
F Gas compliant

Lower installation
and maintenance costs

Less pipe work /
faster connection

Lower total gas charge
up to -80% on a
complete store
comparison

Gas leakages reduced
thanks to "hermetically
sealed circuit"

Faster store set-up

Lower power
requirement and
operating costs

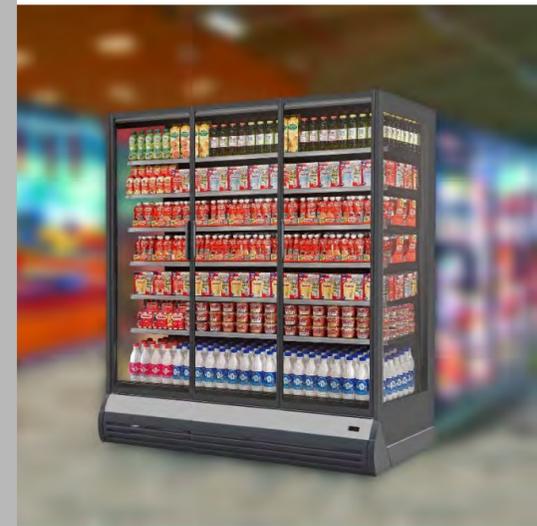

Lower refrigerant charge
per unit

Reduced carbon footprint

Easy components
replacement

Easy integration with
store heat recovery
systems

One loop for both
medium and low
temperature display
cases

Skyview Integral Air

PRODUCT OVERVIEW

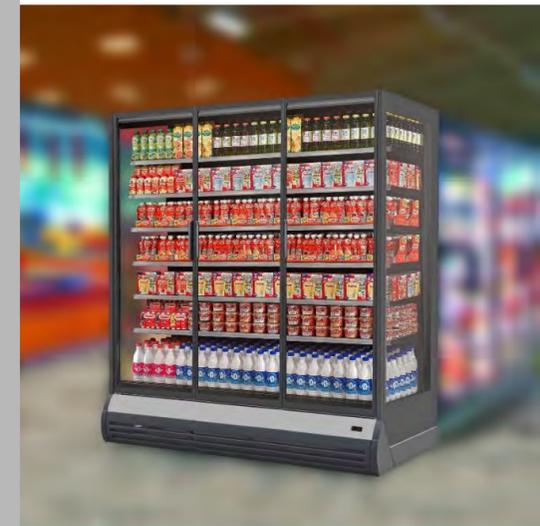

Overview | Product at a glance

Epta Integral is a fully integrated air solution available on SkyView vertical cabinet.

Epta Integral is powered by a compressor using R-290 (propane), a low GWP refrigerant that complies to F-Gas GWP reduction.

This new version has been designed to achieve high efficiency and energy consumption performance as well as to make installation and start up easier.

Epta Integral offers a flexible range of user friendly cabinets with enhanced modularity adaptable to all store configurations in convenience and small store formats.

Skyview Integral Air

PRODUCT OVERVIEW

Overview | Product at a glance

SkyView Integral Air - A new single design with two attractive aesthetics:

New Aesthetics

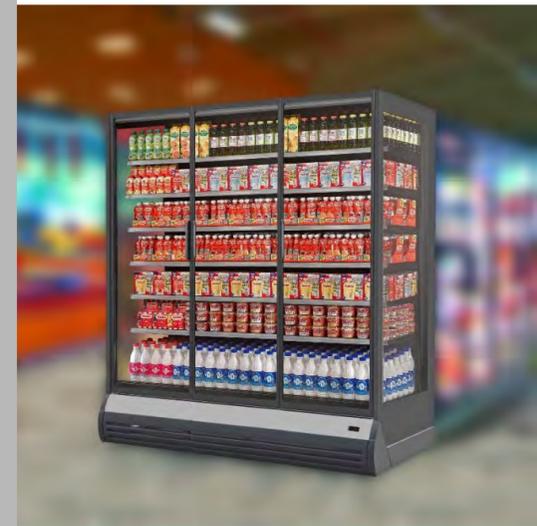

Advance - First in class:

- Frameless doors
- Antibacterial handle
- Advance lighting
- Customizable aesthetic

Value - Cost effective:

- Value doors
- Value lighting
- Customizable aesthetic

Skyview Integral Air

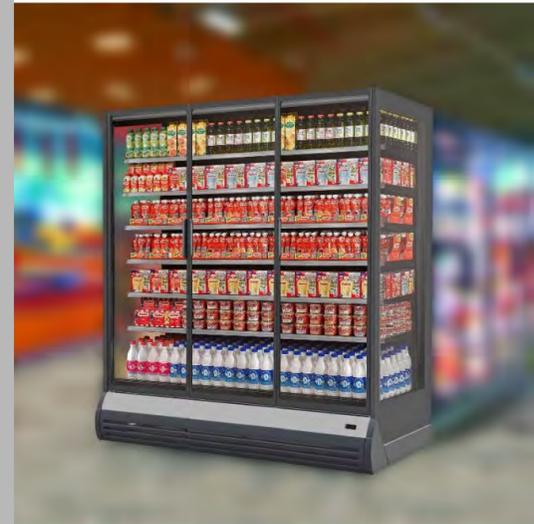

PRODUCT OVERVIEW

Overview

Product range

Main features:

- Environmentally friendly natural refrigerant R290
- High efficiency condenser
- Smart communicating control dedicated to integral cabinets with fixed speed compressors
- Easy access circuit in basement

Integral Air
is available in

1 Height
H20 (2170 mm)

2 Widths

- Efficia +7.5cm (E)
- Modular +7.5cm (M)

4 Lengths

- 125
- 188
- 125 modularity to achieve 250 and 375 linears

1 Closed EOL
196 (N)

Temperature class

- 3M1
- 3M2

LED lighting

- Mullion
- Canopy

Fluids
R290

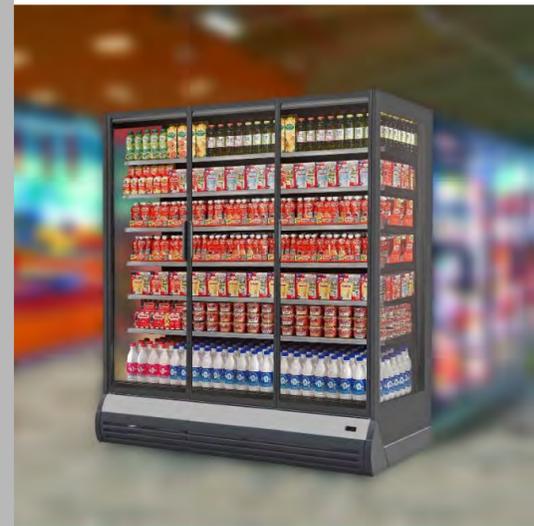

Controller
Dixell

Ticket holder position

- Shelves
- Bottom plate

Ticket holder type

- Universal rail
- Paper

Skyview Integral Air

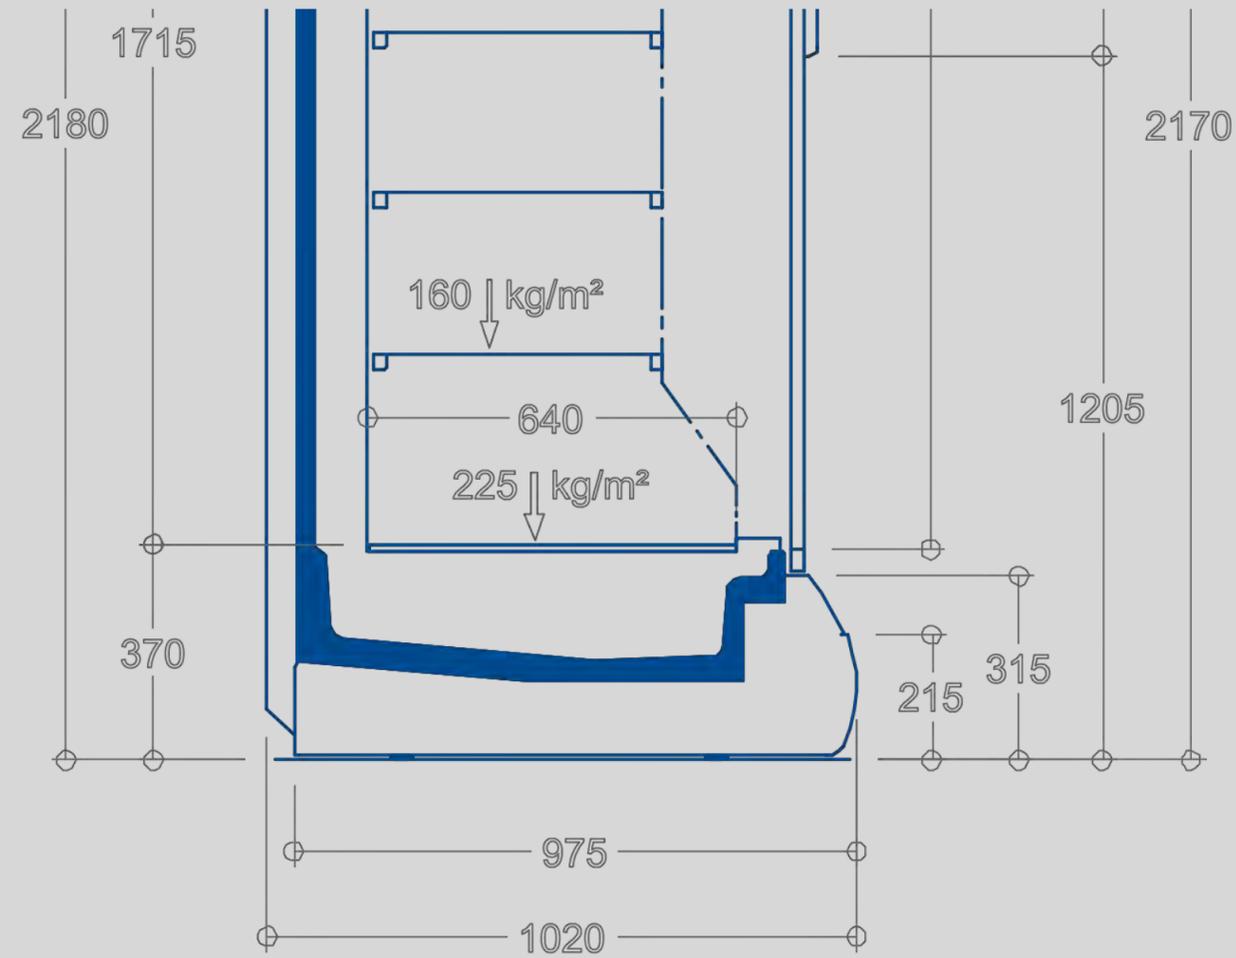

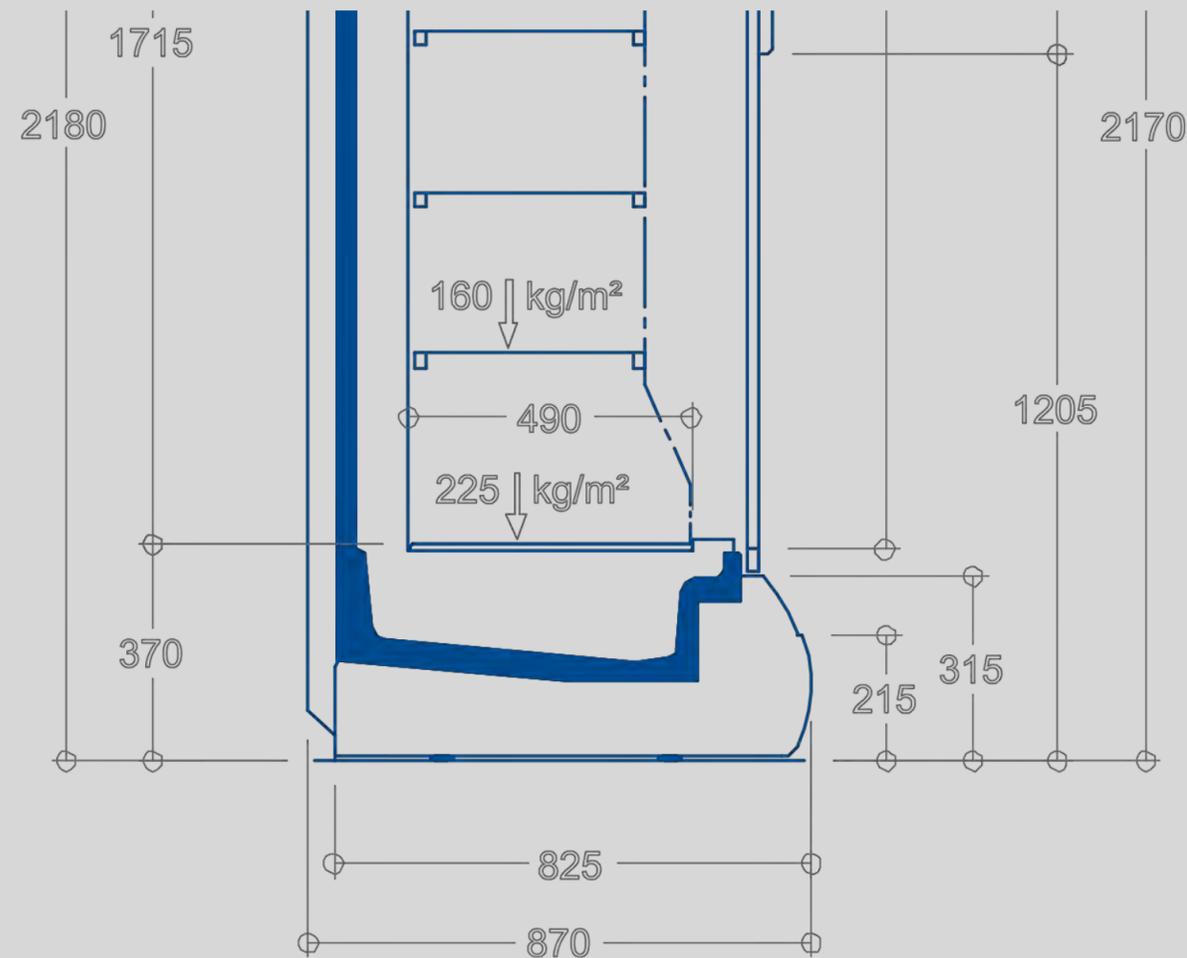

PRODUCT OVERVIEW

Overview | Product range

Two chest depths adapted to your store conditions

EFFICIA (825 mm)

Ideal solution for small and convenience stores

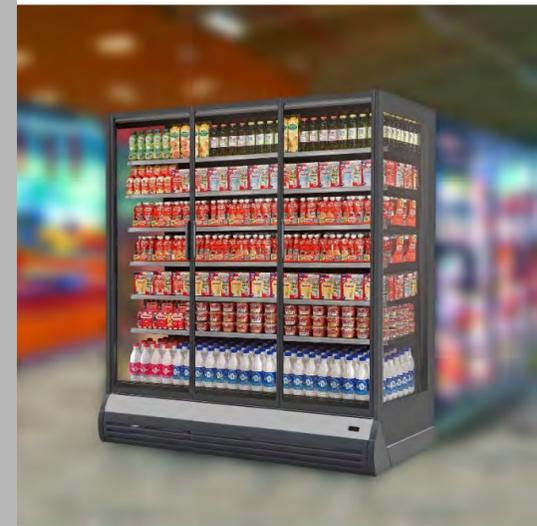

Reduced footprint

Allows more aisles space

MODULAR (975 mm)

Bonnet Névé best seller

Flexible solution for all kind of stores

Integral Air

PRODUCT OVERVIEW

Overview | Main features

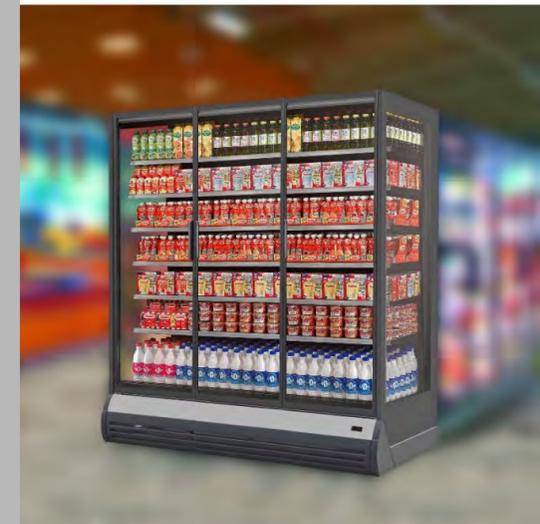

R-290 natural refrigerant

Epta continues to expertly develop its full line of self contained units compatible and optimized for R-290.

In terms of achieving regulatory compliance, R-290 is very appealing. Its global warming potential (GWP = 3) is well below F-GAS global threshold of 150 GWP, which places it in an elite class of refrigerants from the standpoint of minimal environmental impact, qualifying it as an essential technical solution for a long term perspectives.

R-290 has tremendous potential in commercial refrigeration thanks to its eco-friendly, highly efficient and high-performance characteristics.

With a restricted maximum charge of 150 grams per refrigeration circuit, R-290 is a safe and viable natural alternative to HFC performing as well for both positive and negative applications.
